- Relationship Conflict: Personal or emotional disagreements that often hinder performance.
- Process Conflict: Disputes over procedures, delegation, or resource allocation.

Each type has distinct implications for organizational health, with task conflict having potential benefits if channeled appropriately.

The Dual Nature of Conflict: Challenges and Opportunities

While conflict is often associated with negativity?leading to stress, decreased productivity, and employee turnover?it also harbors significant potential for positive change.

Negative Impacts of Unmanaged Conflict

Unresolved or poorly managed conflict can result in:

- Reduced Collaboration: Fear of conflict may lead to superficial harmony but underlying tensions.
- Lower Morale and Job Satisfaction: Persistent disagreements can create a toxic work environment.
- Decreased Productivity: Time and energy diverted to conflict resolution detracts from core tasks.
